DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-33, drawn to a computer-implemented method for adjusting a reference selling profile for a reference product, classified in class 705, subclass 10.

Claims 65-75, drawn to a computer-implemented method for generating a projected sales profile for a particular product, classified in class 705, subclass 10.

Claims 76-85, drawn to a computer-implemented method of revising a plurality of location distribution shares for a particular product, taking into account planned promotions of the particular product, classified in class 705, subclass 10.
 - II. Claims 86-103, drawn to a computer-implemented method for calculating quantities for distribution of a particular product to a plurality of locations, classified in class 705, subclass 28.

Claims 34-64, drawn to a computer-implemented method for setting location distribution shares, classified in class 705, subclass 28.
 - III. Claims 104-111, drawn to a computer-implemented method for selecting markdowns for a product, classified in class 705, subclass 10.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be

separately usable. In the instant case, invention III has separate utility such as selecting a plurality of combinations of markdown dates and markdown percentages. See MPEP § 806.05(d). Because these inventions are distinct for the reasons given above and the search required for Group I and II is not required for Group III, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
